TIG Welded

Radox is one of Europe's leading manufacturers of designer radiators and quality heated towel rails and has been established in the UK since 2008, with its head office and warehousing facilities in Wiltshire.

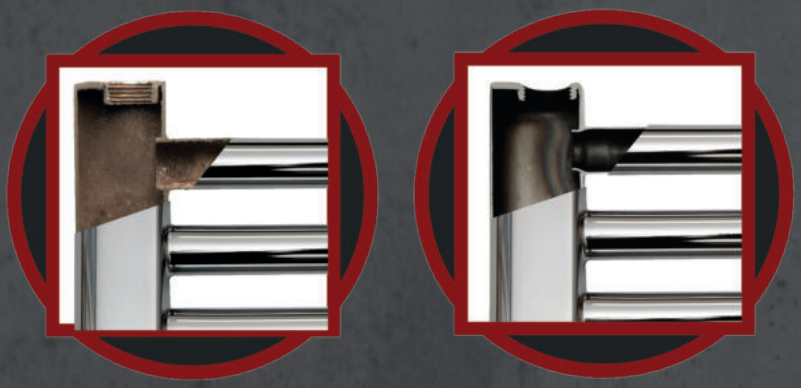
With a wealth of experience in design, thermo-hydraulics, metal fabrication and treatment, specialised polishing, galvanizing and epoxy coating, we have built a portfolio of products that offers our customers a touch of luxury for their homes.

Working in partnership with industry-leading suppliers such as Marcegaglia and Akzo Nobel allows us to guarantee that our products are manufactured using only the highest quality raw materials. We follow a strict environmentally-friendly production process, avoiding the use of materials that produce harmful by-products. This is backed up by our ISO: 9001 and ISO: 14001 certifications, which we have proudly held since the Factory was first established.

Our Quality Control team monitors every step of the manufacturing process to ensure that we offer you beautiful, durable radiators guaranteed for a minimum of 10 years, to give you the peace of mind that you deserve.

Ask your designer about Radox and together you'll find plenty of options to enhance the design of your space.

Inside new towel rail



Competitor **Radox**

Radox radiators are air-pressure tested and sealed during chrome plating.

VIRTUAL WORLDS

EQ

Finishing Guide

Standard paint finishes and Paint Colour Options

Painted rails are sandblasted prior to powder coating, which greatly increases paint adhesion and corrosion resistance. We only use Akzo Nobel paint, one of the World's highest quality paint manufacturers. **Paint Colour Options have an estimated 8 week lead time.**

Quartz Finishes

With so many colours and finishes to choose from, the Quartz glass fronted ranges can be utilised in any part of the house. Whether you want a mist free-mirror in the bathroom or a radiator to match your tiles, splashbacks, furniture and more, these glass-fronted radiators can offer the perfect solution. **Quartz radiators have a 3 week lead time.**

Highest Quality Chrome Plating

The preparation of our radiators for chroming involves specialised, multi-stage polishing and cleaning. The decorative chrome plating is enhanced by the double-Nickel plating applied to the highly polished mild steel, followed by chrome plating. This offers superior corrosion resistance, durability and a contemporary appearance. Multiple salt spray tests have proven that this is the highest quality chrome plating for decorative radiators, designed to withstand the high levels of humidity in the bathroom and repeated temperature variation cycles. The stress of these factors on chrome-plated radiators is so great that it can in time lead to cracks in the Nickel and Chrome layers, causing oxidisation of the exposed steel and exfoliation of the chrome. We are so confident in the durability of our chrome radiators that we guarantee them for 10 years.

Stainless Steel

So confident are we of the robust quality of our stainless steel, we are prepared to guarantee it for 25 years. Made from 100% recyclable, eco-friendly, solid stainless steel- an excellent choice when corrosion resistance is important- our towel rails are suitable for fitting on most types of heating systems and will provide higher heat output than the equivalent sized chrome plated options.

Finish Type	Lead Time	Price Mild Steel	Price (If NO Chrome in Range)	Price (Stainless Steel Towel Rails)

Quartz Exclusive

The Quartz Exclusive radiators, much like the Quartz, are unique glass fronted radiators. They too provide warmth, colour and functionality to any room of the house. Unique to the Quartz Exclusive range is its frameless design.

Minor colour variations may occur in final product.

Capable of having one optional towel bar fitted. If further towel bars are required, please ask at point of order.

Quartz finishes have a 3 week lead time.

Finishes

Please refer to page 5 to select from the extensive range

Quartz Exclusive

Heating Options

Premier XL Flat

The Premier XL Flat heated towel rail is made from highly polished, solid stainless steel, which makes it one of the most durable products on the market. It is suitable for most central heating systems and has 22mm crossbars and 38mm collectors, having superior output compared to any similar radiator.

Electric Options

Standard Electric Only Option: to be added to chosen towel rail

Once you have chosen your desired radiator, choose your electric option. The cost of your chosen electric option should be added to the cost of the radiator. Your radiator is then converted into a sealed electric unit, ready to be connected to your electric power supply.

The Standard Electric option does not come with an adjustable temperature control. We recommend employing the use of a wall plate controller, so that you are able to adjust the output of your radiator.

The elements used in standard all electric radiators are rated IP55.

Important Information:

Internal Operating Temperature Range of towel rail or radiator using this element: **65°C** (note: with standard electric elements, the surface temperature of towel rails (specifically chrome plated towel rails) can get hotter than **65°C** (up to **70/80°C** in some cases) due to various factors (capacity, surface area, material type etc). Consider thermostatic or other regulatory devices if surface temperature could be an issue for you. *Electric radiators should only be fitted in the bathroom by a qualified electrician, in accordance with IEE regulations. They should not be installed within 1.2m's of bath, shower or other wet area. *Prices to be added to cost of the radiator.

Electric Options

Standard Summer Heating Dual Fuel Kit: to be added to chosen towel rail

Summer Heating Dual Fuel kits enable you to use your towel rail on your central heating system or as an electric option, when the central heating is not being used. Simply ask your fitter for operating instructions.

The cost of your chosen Dual Fuel option should be added to the cost of the radiator. Radiator valves will also be required for Dual Fuel Radiators (please see pages 77 & 78).

The Standard Dual Fuel option does not come with an adjustable control. We recommend employing the use of a wall plate controller, so that you are able to adjust the output of your radiator.

The elements used in standard Dual Fuel options are rated IP55.

Thermostatic Electric Only Option: to be added to chosen towel rail

Once you have chosen your desired radiator, choose your electric option. The cost of your chosen electric option should be added to the cost of the radiator. Your radiator is then converted into a sealed electric unit, ready to be connected to your electric power supply.

The Thermostatic Electric option comes with an adjustable temperature controller which regulates the temperature of the radiator and can be used with a compatible remote control - see Page 79 for options.

The elements used in Thermostatic Electric options are rated IPX5.

Returns Policy

Unwanted Goods are expected to be returned in their original packaging and should be returned within 30 days; 20% re-stocking charge on returns or a minimum charge of £25 +VAT will usually apply, but this will be handled on a case-by-case basis and may depend on the Goods being returned.

Items delivered must be checked for damages and/or aesthetic imperfections BEFORE installation. Installed items are deemed to be 'accepted' and are non-returnable.

Made-to-order items (bespoke sizes and finishes, glass radiators and electric towel rails and radiators) are non-returnable.

Any discrepancies with orders (size, finish, quantity, etc.) should be reported within 48 hours of receipt.

Please check your delivery carefully. If you notice any signs of damage to the items or packaging, please sign for the goods as 'damaged' as a precaution and report this to Radox Radiators Ltd immediately (no claims can be made with our courier after 24 hours following delivery of the Goods).

Carriage

Orders totalling a value of less than £50 will incur a £5 +VAT carriage charge. Large, heavy and fragile items may incur a carriage charge- please contact the sales office to confirm.

Important

*Radox reserves the right to change designs and specifications in the interest of product development without prior notice.
*Custom made items are non-returnable – this includes electrical items. Please contact the office for further information.
