RADOX STAINLESS STEEL

...for LiFE

Benefits of Radox Stainless Steel

LIFETIME GUARANTEE

So confident are we of the robust quality of our stainless steel, we are prepared to guarantee it for a LIFETIME.

ECO FRIENDLY

Made from fully recyclable, durable and eco-friendly solid stainless steel.

HIGH HEAT OUTPUT

Stainless Steel will provide that extra heat when it is needed. It delivers nearly 20% more heat output than the equivalent sized chrome plated radiators.

AESTHETIC APPEAL

There is nothing quite like the beautiful lustre of highly polished stainless steel.

ANTI CORROSION

Our stainless Steel radiators are made from solid Stainless Steel. As such, it should never pinhole, rust, corrode or flake.

TIG WELDED

TIG welded radiators are stronger and reduce the likelihood of pinholes and crooked tappings.

FIT & FORGET

Choose stainless steel for ultimate peace of mind. These towel rails are perfect for properties in damp, coastal locations or for second homes that are not lived in every day.

HOT WATER SYSTEMS

The almost indestructible nature of stainless steel makes it suitable for fitting on most types of heating systems. These include hot water (open-vented) systems, where a rust inhibitor cannot be added to the central heating fluid.

Look out for these icons

Available with standard or thermostatic Hybrid heating

Available with standard or thermostatic electric heating

Bespoke sizes are available on special order. Please contact the office for more information.

Towel Rail: Space 1700 x 538 Stainless Steel Matt Black
Valves: Circulus Corner in Black

Standard Electric

To be added to chosen towel rail

Once you have chosen your desired radiator, choose your electric option. The cost of your chosen electric option should be added to the cost of the radiator. Your radiator is then converted into a sealed electric unit, ready to be connected to your electric power supply.

The Standard Electric option does not come with an adjustable temperature control. We recommend employing the use of a wall plate controller, so that you are able to adjust the output of your radiator.

The elements used in standard all electric radiators are rated IP55.

Product Code	Model	Finish	Price (£) ex VAT.	Price (£) inc VAT.
RXEL-100WSTD	100 Watt Standard All Electric	Standard	£146	£176
RXEL-150WSTD	150 Watt Standard All Electric	Standard	£146	£176
RXEL-200WSTD	200 Watt Standard All Electric	Standard	£146	£176
RXEL-300WSTD	300 Watt Standard All Electric	Standard	£146	£176
RXEL-400WSTD	400 Watt Standard All Electric	Standard	£146	£176
RXEL-600WSTD	600 Watt Standard All Electric	Standard	£146	£176

Important Information:

Internal Operating Temperature Range of towel rail or radiator using this element: 65°C (note: with standard electric elements, the surface temperature of towel rails (specifically chrome plated towel rails) can get hotter than 65°C (up to 70/80°C in some cases) due to various factors (capacity, surface area, material type etc). Consider thermostatic or other regulatory devices if surface temperature could be an issue for you. Electric radiators should only be fitted in the bathroom by a qualified electrician, in accordance with IEE regulations. Prices to be added to cost of the radiator.

2 Year Guarantee on Electric Options

Thermostatic Electric

To be added to chosen towel rail

Once you have chosen your desired radiator, choose your electric option. The cost of your chosen electric option should be added to the cost of the radiator. Your radiator is then converted into a sealed electric unit, ready to be connected to your electric power supply.

The Thermostatic Electric option comes with an adjustable temperature controller which regulates the temperature of the radiator and can be used with a compatible remote control - see Page 79 for options.

The elements used in Thermostatic Electric options are rated IPX5.

Standard Hybrid Heating

To be added to chosen towel rail

Hybrid Heating (Dual Fuel) kits enable you to use your towel rail on your central heating system or as an electric option, when the central heating is not being used. Simply ask your fitter for operating instructions.

The cost of your chosen Hybrid Heating option should be added to the cost of the radiator. Radiator valves will also be required for Hybrid Radiators (please see pages 77 & 78).

The Standard Hybrid Heating option does not come with an adjustable control. We recommend employing the use of a wall plate controller, so that you are able to adjust the output of your radiator.

The elements used in standard Hybrid Heating options are rated IP55.
